

Tree of Life New Age Bible Course Introduction

First Level CREATOR ONE

REMEMBER—HOW TO STUDY

In studying our work in this New Age school, when we use a word, we expect that you are going to take the literal meaning as defined by Webster, or any standard dictionary.

DO NOT try to attach some hidden meaning to the word, or words. Forget all the metaphysical meanings, religious interpretations, or any of the allegories which you might have studied.

If we should wish to express a Truth in allegory, then we will say so.

Remember that we do not teach a dogma, or set of rules, that we say you must follow. The only rules we use are nature's own set of scientific laws, which we have nothing to do with. This is the way the Great Creator made this Universe, and we cannot change the rules.

For example, when we use the term "Holy Bible," we are not inferring or implying by this name, or term, that this is the only book there is that has truth in it.

There have been many Avatars which have come to Earth, and have helped to raise the consciousness of Man. TRUTH is, and always will be, and that Truth is all within the Man himself.

NOTHING NEW

There is nothing that we can teach you. We can only help you to remember. Most beings need only to have their thinking stimulated in order for them to bring back to their conscious mind the facts, for they have lived many lives.

GOD

We do not separate God from Matter. This must be true, or else God could not answer our material needs. There is a way in which these results must be obtained. They are received—for the WORD must be fulfilled.

In order to work in harmony with the laws of creation getting good results—it is first necessary to develop into our consciousness an idea of the nature of the God who created it. For who can LOVE so great a being, as our Creator, if we do not have some IDEA of His way of working and His nature.

First, we must bear in mind that Spirit, Soul, and Consciousness all demonstrate or manifest through matter.

PREPARE FOR THE NEW EARTH

MATTER

Some people try to turn their back on matter by saying that matter is merely an illusion. That is not true; it is the way they use the word.

It is quite evident that it would be poor judgment to disregard the substance of the world, or the plane on which you are operating and functioning at this time. This would only be a half- reality.

The second thing to remember is that there was not matter, but that God created it. Man has no right to ignore God's creation, but must become master of it. For HE, JESUS, is to become LORD OF EARTH. Man did not create matter originally.

For many centuries, mans has had his consciousness of the unseen dulled. He tuned his whole consciousness to what he could see with the physical eyes alone, and disregarded the Creator.

CLEANING OF MIND

Man was a very unsanitary and evil, or negative acting person. He—the shedder of much blood—was not Godly in idea or mind. He killed not only for meat, but in wars and other murders. But now, man is improving. He is becoming cleaner—at least outwardly.

ADJUST OR PASS

Man is learning that it does not pay to go against basic natural laws. He is getting rid of the dirt and negative part of his nature slowly, but surely. The overall level of man's consciousness is raising and will now raise rapidly in this New Age. Those who refuse to adjust will not stay long but will pass beyond.

When the name "GOD" is used, it is always hard to understand as to whether the Absolute is meant, or the One existence, or the Supreme Being, who is the Great Architect of the Universe, or the GOD who is the Architect of our solar system.

OUR SOLAR GOD

So let it be understood that the word "GOD" means the GOD of this solar system. For honestly, I have been told that if we get across to man the understanding of this solar system, then we have done a real good job—and it will be a pretty swell place to live in.

HOLY TRINITY

The division of the GODHEAD into the FATHER, SON (SUN), and the HOLY SPIRIT is also confusing. Although the beings designated by names are immeasurable above the average man, and worthy of all reverence and worship, HE is capable of rendering to his highest conception of divinity. Yet, that they are all different from one another is actual fact.

They are all present in our world and are actually nearer than hands and feet.

WHERE IS GOD

It is a literal truth when we say: "In Him, we live and move and have our being," for none of us could exist outside of these Great Intelligences, who pervade and sustain our world with all LIFE.

This will be shown from a scientific and material side later in the studies of the Law and Prayer.

In fact, this understanding of GOD is very essential in order to work with the forces of nature.

But, if you don't grasp all at once the understanding of these realizations of the real GOD, and this solar system, be content at present to know that there is a Great Creator, or creative SENTIENT POWER that sustains us...that pervades all space and time.

EVIL

Plato: In the words of Plato, the first expression of the idea is that GOD and nature, which manifest in all things—seen and unseen—are working together CONSTRUCTIVELY for good. That good is the only resultant that is indestructible. Plato says that Evil is but our own interpretation of the work, or process, of nature that does not appear constructive.

The keynote on this subject is "BEING IS ESSENTIALLY BENEVOLENT."

SOUL

Plato accepted the Soul of Man and the Soul of the World. He called this Kosmos—that the reasoning of Man, or the tool of Mind of Man, was composed of the same substance.

This realization gives Cosmic Divinity or Universal Power and intelligence – which which is the Soul of God.

MIND OF GOD

Think of the solar system as the space and expanse of the Mind of God, and that within that boundary exist the twelve planets of this system, and that this entire space is filled with THE ARCHITECT of the SOLAR SYSTEM.

MYSTERIES

The understanding of the Trinity is like all great mysteries of the ancients and their teachings. It is so simple, and yet, a reality. At that time, they felt that some would misuse them. This is the reason why they were called mysteries in this world.

Today, in this New Age, they are still Mysteries, because the mass of the people have been taught to think in a complicated way in anything they cannot feel, or see, or touch.

Let us remember that GOD, and the other Great Beings, are not far away in past ages of space, or time.

CHRIST

The SUN is the visible manifestation of THE ARCHITECT of this solar system.

The supreme beauty and good of Man is the imitation of God, which finds its counterpart with the Christian in the "IMITATION OF CHRIST."

FIRST THINGS FIRST

In learning to do the thing that every Man must do in order to be a Man of God, the following is out of the first Commandment: "I AM THE LORD THY GOD, AND THOU SHALT HAVE NO OTHER GODS BEFORE ME." There is a reason for this, for it is true that the Creator, which is the all that is in substance of "BEING", is the one Mind and Self-less Creator.

EARTH

The Creator is Self-less because alone, HE senses not; that is, not in the dense world or psychic world.

Only through the emotions and senses of His Creative Man can GOD attain the joy and sorrows of dense matter. You might ask: "Why would GOD want to experience these sensations after experiencing the bliss in the plane, or realm, of higher vibration, which is so much greater?"

Why is Man, then, concerned about Life if he is only a channel for GOD's experiences?

KNOW THE SELF

In the old school of Delphi, there was an immortal bit of wisdom given. It was: "MAN, KNOW THYSELF."

Another statement which comes out of the mist of antiquity is: "AS ABOVE, SO BELOW."

If you will take these two statements, and sit quietly in thoughtful meditation, or just sit and think, you will learn much.

LIFE

Again, remembering the above, the object of LIFE on the spiritual plane above (in vibration), in all lives, is a spiritual Man in a spiritual world of reality, with the objective of experiencing joy, and giving continuous joy, by and through GOD, the Creator.

The Bible says in Rev. 4:11: "Thou hast created all things, and for thy pleasure they are and were created." Phil. 4:4: "Rejoice in the Lord always and again say rejoice."

HELL

The world we live in unfortunately appears so distrustfully reactive. The only hell man shall ever know is his own.

Therefore, our joy should start in this dense world by helping to relieve the apparent disorder of those around us.

Remember in Luke 11:52—"Woe unto you, conventionalist, for you took away the sacred science; you did not go in and those who were about to go in you prevented."

This is the real science of Man you are about to study.

PEACE and FULLNESS of LIFE abide with **YOU**.

I thank the Father
For this day,

I thank the Father
For this way,

I thank the Father
For a world so gay,

So tonight with moon
So bright
We rest in pure delight.

First Level CREATOR TWO

We have called these studies a science because it relates to the use of the tools God gave man, and how to use the force and power of God and its various manifestations.

There is an interesting reaction to the above statement which has been made many times. That reaction is that they feel that this attitude toward God is cold and unfeeling. But that is not what they are saying at all, in reality.

What they are saying is that you are making this God a real dynamic force and power, and that if I do not get my prayers answered, then I must look to myself to see what is wrong with my thinking, and I can't blame God for it. In other words there is no room for excuses—no alibis. THAT IS RIGHT.

When there is Law and Order, there is science and an overall pattern, and things in the act of being created.

For example—on the earth plane there is an ebb and flow of all things. "As above, so below." It is true in the microcosm of the human heart, as well as it is true in the macrocosm of GOD, the whole, the One Mind.

Our heart's diastole and systole, commonly called heartbeats, is in harmony with the bloods ebb and flow—a rhythmic pattern—as in the lungs in inspiration and expiration as in the psychic body's throb with electronic manifestation of spirit energy.

The ocean tides come in and go out; day succeeds night; seasons arrive and pass; the ages of time incline and decline, constituting eons of time.

So vast is this latter conception that we are careless about retaining it within consciousness of mind and tend to dismiss it from consideration, with the same attitude we carry toward other abstractions, such as the vagueness of a poetic statement as belonging to the whole of Creation, or the life of the gods, as of no comparable relation to this mundane life here.

Involution and evolution forever succeed each other and may be known in the wide horizontal view as the heartbeat, the ebb and flow of the manifestations of God. Time itself is not existent in God's world, but time in the plan of earth's limitable subsistence is but the tick-tock with the existence of GOD.

Remember God geometrizes, for geometry is but the Numeric of form. Another has said, when God created the world, His first thoughts were expressed in numbers.

THALES, one of the ancient Sages, in talking of God, says, "The most ancient of all things is God, for He is not begotten; the fairest is the world, for it is His work."

"The world is animated, and that God is the Soul thereof, diffused through each part, whose divine moving virtue penetrates through the element of water."

Thales, on being demanded what God was, answered, "That which hath neither beginning nor end."

Socrates said Philosophy is the way to true happiness, the offices whereof are two: to contemplate God, and to abstract the soul from corporeal sense.

It is not that we cannot picture God for you the same as the ancients but realizing that these quotes were made five and six hundred years before the Master Jesus was here. Somehow people often feel that this business of getting acquainted with God is a new deal; in a most abstract sense it is, for the conditions electrically, mentally, and from all sides are different.

The point however is that we must all be philosophers to some degree, if we are going to survive the radical changes taking place.

In Chicago, June 13, 1963 (UPI), an article was headed, "A Scientist Looks at God and A-Age." In the article, he goes on to say, "A nuclear scientist said this week science seems to be on the verge of discovering God on every frontier, not as an ideal, but as the most fundamental fact of nature."

Francis B. Parzel, senior scientific advisor of the Armor Research Foundation, addressing the City Club of Chicago, says, in appraising the nuclear threat, "readjustment to the nuclear age hinges on what we put first, to abide by universal moral and logical rules for the sake of humanity as a whole, or merely to have our own way." The best way I know to tell the difference is to ask the question, "Do you really believe in God or not, and to what extent do we regard the existence of God as an issue in the cold war?"

Again it is a case of whether you really want the peace taught by the Master Jesus, or must your ego be fed?

The first step to understanding the GREAT CREATIVE POWER—GOD, is to get to realize "IT"; ENERGY is Power—it is that which the Spirit motivates—it is the Life Force after it has taken on the characteristics of the Christ and his Principles. You are using energy every moment of your Life—it is Light—it is God in action.

You could not live without energy. It is manifest on every plane and in all the multi-waves, "IT IS ALL THERE IS."

Be consciously aware of this mighty force and consciously try to

work with It. The greatest of all Mysteries is that of God's consciousness in Man.

USE THESE AND REPEAT THEM OVER AND OVER AGAIN.

Take one and use it as the Day's Thought. Carry it on a card, read it until you can repeat it from memory.

MONDAY—

I cease to think of God as external. "IT" is within me.

TUESDAY—

It is "I", Man, who is IN the Universe, and not on it, or merely of it.

WEDNESDAY—

The consciousness of God is Life, but it is more—it is love, and it is power unlimited.

THURSDAY—

The greatest attribute is LOVE. Love is creative and protective.

FRIDAY—

Love is inspiring and illuminating, therefore it gives Life and Light.

SATURDAY—

These are existent actions. If man will consider himself as the light of the life, in the love of God with him.

This is a prayer or poem which is a starting point of understanding.

THANK YOU!

I thank the Father
for this Way.

I thank the Father
for this day.

I thank the Father
for a world so Gay,

So tonight with Moon
so bright,

We rest in pure delight
In the shadow of God's
night.

First Level CREATOR THREE

Let us first off realize the greatest in line of importance of all facts. When we deal with Life, we are dealing with the Power of God flowing through His Son. I could write all day, and if you would, you could read all year on the subject of this dynamic force, which is real, which is everywhere, which is all that is, which is all we can hope to be.

In the religious teachings of most organizations, little is said about God—a great deal is said about what GOD said in the Holy Bible, the Jewish Book of the Law, then there is the Prayer in the Siddur to God.

In other Faiths of the Eastern religions, GOD is called Allah, and the interesting thing here is that the people of the East which the Christian church has sent so many missionaries to, in an effort to convert them—they are very concerned about GOD, even though they call him by another name. They will sit for hours in meditation, in an attempt to gain greater wisdom.

For your GOD may manifest as sunlight, the song of the birds, as the new-born baby in its mother's arms. But it is one and the same GOD.

In this age we must learn to feel GOD'S presence—the presence of the GOD Force moving through us. Know—know—know that it is right here, not in some far-off distant heaven.

The ancients considered this as of the first importance, because if you do not feel the presence of the teacher, how can you communicate?

As yet, few people in the New Age really understand today what the ancient Greek philosopher Plotinus tried to give to the world, nor did many realize it in that day, but now the sands of time of that age have run out, and this is the new age, Today, the thinking of the "mass mind" is still trying to blot out the light of wisdom that Plotinus gave to the world, the same as the words of Jesus.

Plotinus says there exists nothing in this universe or this Solar System but God. We know the ego will not like this, but whether it does or not does not change the fact. If you speak of the subject of God, then you are always thought to be speaking of some external and personal God; this is absurd, because there is no place in nature for such a God.

To Plotinus nothing has any real existence but God; this is when we use the word really on the level of God-existence. That all the things, forces, energies, and laws in this universe are creations, created by the internal activity of God, of his consciousness. These creative phenomena is best explained as follows. No man can see his own face without the use of a mirror of some kind.

Thus likewise God when starting a cycle of activity, cannot himself see without some substance to reflect in.

There is no other substance except that which belongs to the God consciousness to serve as a mirror, thus it steps out of itself, out of its own center, for self-examination, and looks within. Thus an intellectual is created, by GOD perceiving the images existing within its own substance, so the activity which is at the periphery toward the center—its radiant field—has created the Universal Mind. This is a demonstration of "As above, so below," for this is the way man prays, by direction of his own thoughts to his own center, the center of his consciousness, the Heart.

In the Holy Bible in Ezekiel 18: 4, "Behold, all souls are mine, the soul of the father as well as the soul of the son is mine, the soul that sins shall die."

External objects present us only with appearances of these, therefore, we may say we possess opinion rather than knowledge. We are interested in appearances, only because they are reflections of the patterns in the unseen world. Our question lies with the ideals in the Mind of God that exists behind appearances.

Are they without us, and is the reason, like sensation, occupied with objects external to itself? What assurance that our perception is infallible? The object perceived would be something different from the mind perceiving it.

We should have then an image instead of the true picture in the Mind of the Father. It would be out of all proportions with Nature, to believe for a moment that the mind was unable to perceive ideal truth exactly as it is. We do not have a certainty of God Knowledge concerning the world of intelligence. It follows therefore that this region of truth is not to be investigated as a thing external to us, thus only imperfectly known. It is within us. Here the objects we contemplate, and that which contemplates are identical—both are thought. The subject cannot surely know an object different from itself.

The world of ideas lies within our intelligence. Truth, therefore, is not the agreement of our apprehension of an external object with the object itself. It is the agreement of mind with itself. Consciousness, therefore, is the sole basis of certainty.

The mind is its own witness. Reason sees in itself that which is above itself as its source and again that which is below itself once more.

Therefore it is a fact that God does exist, as we only know it because we can only know what God knows in His mind, as our mind is only an individualized part of God's mind.

THUS GOD IS A MATERIAL FACT, IN THE REALM OF HIS LEVEL OF CONSCIOUSNESS.

THIS WEEK'S MEDITATION

MONDAY:

In God's Mind do we (God and I) create all things in my life.

TUESDAY:

In God I rest.

WEDNESDAY:

With God all things are possible.

THURSDAY:

In God I rest.

FRIDAY:

This is the way; I accept my supply and good this day from God.

SATURDAY:

I love, through action, my fellow man.

First Level THE MEDIATOR

A mediator is a go-between, one who interposes between two parties in order to harmonize or reconcile them. The great Christ is the Mediator of this solar system. He diffuses unto all of creation the Light, Life and the Charity of the Father.

Here on the Earth, the Lord Jesus Christ is the Mediator between us and the Great Christ— for Jesus says: "Only through Me shall you see the Face of the Father." Through Jesus' consciousness and His mantle, men can reach the great reality of themselves and their Father.

The term go-between is a very realistic term. It points out the realness of our Lord Jesus and His great function for man, who has lost all consciousness of life and of the Great Creator of the life.

Man struggles along in life—straining with those things of the earth—striving to have two cars, two houses...to have a good-paying job, to have a nice-looking woman, and all other worldly goods.

The whole of a man's existence today is wrapped up within himself. He no longer can reach out from himself to see the world as it truly is. For, even as he walks down the street, he sees the buildings and those passing by through his own thoughts and with all of his biasness and narrow-mindedness, he sees but not even a fourth of the material world.

The use of a go-between here is one who has reached and sees past the things of the world—the concepts and ideas of man—and reaches into the greatness of the Creator without opinion and without desire. Thus, he links the two together—being on earth but giving out the Truth and the Light and the Reality of the One World.

Jesus stated in the New Testament: "For, lo, I will be with you unto the end of the Age." He is ever-present and always at hand—unifying man and the Creator. He is a channel of the Great Light and Wisdom of the Father for the earth.

In prayer—when one reaches his mind and his Soul upward towards the Creator—he travels through this Great Master—for He has given Himself as a channel for the Word.

Man can no longer stand the Light, or the Truth of God, so there has been placed for him a Mediator, who brings things down to the level man can understand and cope with.

By man's act of harmonizing himself with this Mediator, he then becomes in harmony with the One for whom the Mediator mediates for.

Jesus says, "I am the Way, the Truth, and the Light." Thus, He took on the greatness of God while here on earth that man could see it. After the ascension, His spiritual body diffused around the earth and thus, became the mystical body of Christ of which all men, whom receive the Light of Christ, become living, moving, active cells within this body of which the ruler of this body is the God head.

To get in tune with the Mediator, one must follow, implicitly, all of this Commandments which bring forth out of the depths of man the great love for his Creator.

First Level MEDIATOR TWO

In the previous lesson we learned of the Creative force and the power of the spoken word. This gives to man a choice and control of his life, which we will learn of in the lessons on the Law as taught by Jesus in the Second Level Lessons.

In the lesson on the Creator we are actually covering the ACTION brought about by the God force. This lesson is the covering of the "WHAT HAPPENS" in the dense material which we handle everyday.

By observation of denser matter and condition the World is in today, you might have guessed by this time that the Creative power has been abused.

This having happened necessitates the presence of a Mediator, or, if you prefer, a Medium. What is a Mediator? It is a person who is the go-between, the channel.

In order to clarify this word, let us see what Webster says—"something intermediate; a middle state or degree; an intervening thing through which a force acts or an effect is produced; any means, agency, or instrumentality."

Our first scripture reference is First Timothy, Chapter 2, verses 3, 4, and 5:

Verse 3: This is good and it is acceptable in the sight of God our Savior.

Verse 4: Who desire all men to be saved and to come to the TRUTH.

Verse 5: For there is one God and there is one mediator between God and Men, the man Christ Jesus.

The situation in the world as it stands today is that all planes of consciousness need an awakening.

The VITAL FORCE which is Divine and should be manifesting itself through man is absent. Sin is transgression of the Law; it is also ignorance of the Law.

THE LAW IS SPIRITUAL

When man, who is also spirit, violates the Law, the spiritual state of Mind is disturbed. Man's denial of truth and acceptance of ONLY the apparent has caused the ADAM state of Mind to manifest...then death, which is a chaotic condition. A false state of consciousness swoops down over the creation and lulls it to sleep, KNOWN IN VERY SEVERE STATES AS DEATH.

The divine Son of God must then become the Herald, the Messenger of the Mediator. The Herald shall declare, "Arise and Shine, for the Glory of the LORD is risen upon the Earth."

The Mediator seeks and saves that which is lost. He is the divine Humanist. Paul said that the Mediator is between God and Man...the man Christ Jesus. Christos translated is to be interpreted, "the anointed Savior."

Once we are fully aware of our Creatorship, we begin to Mediate between Light and darkness, between the apparent and the real. This is not saying that the dense world around us is not to be mastered and worked with, but it does say the Law is changeless and eternal. Also, that the cause of what is apparent is the Law working through the Mind and the pronounced word by man, given by the Creator.

Paul says in First Timothy 1, verse 8, "Now we know that the Law is good, if anyone uses it lawfully..." Understanding this, that the Law is not laid down for the just, but for the Lawless and disobedient. The Children of Earth today are disobedient, that is why all have sinned and fallen short of the Glory of God.

The Mediator, also called the Son of righteousness, with healing in his wings, therefore brings into manifestation the Law. The infallible Law, therefore, changes the atmosphere from a negative cycle to a positive cycle transforming Heaven out of Hell, since Paul says, "be ye transformed by renewing of your Mind." We must, therefore, come to the Consciousness that the Mediator uses Mind in operation of the Law.

This School teaches that Mind is the Father, that the Body is the Son, and Spirit is the Holy Ghost. Therefore, the Godhead itself, manifesting physically, becomes the Mediator.

Jesus says, "I and the Father are one." "I go to prepare a place for you, and I will come to get you, that where I am you may be also."

Though the Power operates through the Son of God, which is man's physical body, it is still another form of Mind. For mind is the primal will for good, the operator of the Law.

Salvation is the cleaning and the perfecting of your individuality through Christ, the anointing.

We are the congregation of the Earth, gathered in the outer court of the Temple of Life, and the divine Man the MASTER. He who has become enlightened and perfected is the High Priest, after the order of Melchizedek.

Read Hebrews Chapter 7. While reading, keep in mind the following, that you may yourself understand better:

1. Know that a real order of Melchizedek does exist, and that in this chapter is described many things about it.
2. Our bodies are the temple.
3. Our will and personality the Lamb of God for sinners slain.
4. Our hearts the Altar.
5. The Law operating through us is the High Priest.

By enlightenment of Mind, strengthening of will, singleness of purpose can we save and unite the World, the entire cosmos, through Jesus Christ the Way Shower, the first among many brethren.

Christ must, and is returning. The return of Christ will be complete; the return of Law and order, peace, joy, justice, love, and compassion.

The divine Self will reconcile us to the infinite Law of Cosmic Creation which up to this time has been accursed and cut off.

The key which makes you one with the Mediator is the manifestation of the Christ Mind in you. The Christ Mind is the anointed Mind, the perfected Mind: the mind of the Father through the son (flesh). That is why Paul said, "Let this Mind be in you"..."which was also in Christ Jesus", who walked not after the flesh but after the spirit.

In conclusion, to be comely Minded, or as Life Science teaches it, to be Lawlessly Minded is death. But to be Spiritually Minded is Life.

In ADAM WE DIE. But by Christ we are made alive.

First Level THE CREATION

The origin of this Solar System and its Creation

Many times during a month I am asked the same question, "How was our Solar System created?"

To begin with, we should quote the first chapter of "The Gospel According to John", verse one, quote, "In the beginning was the word, and the Word was with God, and the Word was God. He was in the beginning with God; all things were made through him, and without him was not anything made that was made."

Man is trying to understand God both with the Bible and the Great Philosophies and now his great striving is Science.

But like all of his strivings he looks first to what he sees in the material world and material experiences; he bases his Mathematics on this also.

Therefore, all of his theories or premises are all in accordance with his level of Consciousness, which determines his concepts.

Like everything created, the understanding of it grows with its use and its existence in the Minds of the people. So it is with theorem, especially those that leave out God and the Great Creative Energy of the Father's Mind. They become incompatible with observed results, then it is abandoned.

The state and level of our understanding of the origin of this Solar System, will not bring us any closer to the original truth than our general understanding of nature as it truly is.

Until we know what we are, until we know our SELF, we cannot conceive from whence we came, or for that matter, from whence the world came.

Any thoughts of things in this category of speculation are only to be regarded as unproved theories.

At this stage of development, we will explain this question of our Universe in the following way.

This does not mean that at some time even a better understanding than is given here will be obtained. This is not a complete theory but the basic parts so that you can put them together and understand.

We will avoid the course in considering the origin of the Universe, but by understanding its nature, the origin can come to light in YOU only insofar as the substance and its nature are clear in your mind.

COSMOLOGY

Let it be first understood that there are not destructive acts in the Mind of God.

We know that this Solar System is continually building itself up to complete the original WORD of the Father.

Evolving order out of Chaos and that there is no such thing as immaterial substance. That non-existence will never come.

There is only the transformation of energy from one form to another, some in denser forms, some in less dense forms, some seeable, some unseeable with the human eye—until the Eye is more highly developed.

We know all is a fundamental part of the same being, "The Father."

One of the classic differences between scientific investigation of this subject is that one sees cosmic radiation and secondary radiation of lower frequency, being the resultant of disintegration of substances and the other regards cosmic radiation as a by product of the creation of matter in outer space.

The fact of the matter is that cosmic rays are not cosmic creations in outer space but are created in our own atmosphere by the ultra-violet seeping in and there uniting with nitrogen and two other elements which produce what man calls cosmic rays.

In fact, it is both the sun's rays and the forces in our atmosphere which create cosmic rays and they will not injure those that have started to accept the Christ Light into their bodies.

One of the elements in our Solar Concept of creation is Time.

Time is a point in THE RELATIVITY both in relation to cyclic motion and the state of density, when this takes place in a one state of frequency, we have a dimension of time related to that particular time.

Never the less when you are in any world or plane of vibration and you wish to relate one plane to another you will have time equivalents or (+) or (-) to some relative interims.

Events are coincident of vibrations and depend upon vibrations and their positions.

Time is being seen as the transient flowing framework of matters, events and living substance.

Think of time as it is possible to regard matter as nothing more than such a series of events, with an interval of recurrence shorter than the minimum interval of sensual perception.

One of the second most important factors to think of in creative analysis is that of space.

We are not going to tell you all of the controversies. We are going to state simply that there is no such thing as space in this solar system, and what they are calling space, lies in concentric layers around the Sun in this Solar System.

The three lines dimension is a measurement for a building—road—or some small object.

Light radiates from its source and is globular.

The measurement of the speed of light is another test made under minor conditions. In other words, lights' 186,324 miles per second is very much out of line. Einstein's work was relative to other straight-line paths.

Another way to say this is that time is the result of periodic alternations or vibrations.

A solar day is a primary period, the period of light and darkness the Bible speaks of.

A solar sun cycle is a second factor as it swings North or South of the equator.

A third factor is the Earth's cycle around the sun.

All other measurements are subdivisions of these factors such as seconds-numbers-hours-frequency of light-sound waves-the motion of the planets-moon-life and transition.

Time does not exist—except as a relative standard of vibration frequency measurement.

These definitions of time should help you to get a new concept of the origin of this Solar System.

The origin means the first vibration, (The Word spoken by the Creator).

The process of Creation means the evolution of harmonious secondary vibrations from the primal one.

The continually sounding WORD of GOD, the formed, the source of the great Harmony.

The fundamental universal vibrations is the one known as the constant which is a vibration of 3.29×10^{15} cycles per second or 2.843052×10^{20} cycles per mean solar day.

It corresponds to a calculated wavelength of 911.27×10^8 centimeters of 911.27 angstrom units.

This is the fundamental frequency or internal frequency, of both the positive and negative electrons which are the primary unit of matter.

One of the laws of vibrating bodies is that a vibrating body sets up harmonic vibrations at intervals of one octave or at a point of successive doublings $+1/2$ of the fundamental frequency.

In a musical sense these harmonic notes are the closest possible to the fundamental vibration.

It is found that the intervals numbers squared show up more frequently than the one between and that octaves 4, 9, 16, 25, etc. both above and below the fundamental octave 1, these show up more than prime numbers.

In limited vibrations, such as string or reed instruments, the frequency is above that octave 1 or bound vibration.

A cell is a persisting condition of electrical tension in free vibration, within the body of a larger cell.

These cells are lower frequency of vibration than the octave 1.

The harmonic cellular intervals are $1/2$, $1/3$, $1/4$, $1/5$, etc. of the fundamental frequency while those of a bound vibration are 2, 3, 4, 5, etc. lines the fundamental frequency.

The heterodyne or beat vibration exists when two different frequencies exist together and create a beat pulsation is set up compositely equal to the difference between the two primary frequencies.

The following is expressive of the condition:

- F = induced beat frequency
- f = the higher or primary frequency
- $f/2$ = lower or secondary frequency
- p = primary period or reciprocal of the primary frequency
- s = the secondary period
- p = the beat period or $1/F$

The production of vibration of all possible frequencies from one fundamental vibration is accounted for by extensions of these two Laws.

F = the fundamental vibration of 1 or unity with this—

The harmonic frequencies are 2, 3, 4, 5, 6, 7, 8, 9, and $1/2, 1/3, 1/4, 1/5, 1/6, 1/7, 1/8, 1/9$, etc. units with octaves 4, 9, 16, 25 with $1/4, 1/9, 1/16, 1/25$ etc. accentuated.

Each octave is subdivided into notes.

They are beat frequencies = product of second law

For instance $F = 1 - 1/3 = 2/3$ or the induced beat frequency is $2/3$ of the fundamental frequency.

This shows that the induced beat frequency is $1/16$ of an octave above the $1/2$ harmonic or $5/6$ of an octave below 1.

The combinations between the fundamental and various harmonic frequencies induce corresponding beat frequencies which are not harmonics.

Combinations of these make possible the forming of many notes in each octave.

The intensity or importance of the note and degree of harmony depends largely upon the emphasis of the squares of each harmonic interval.

The third point is that each of these combinations of simpler units or cells, brought together produce a new unit, this results in a new fundamental frequency for the individual, higher than that of the part thereof. With the vibration largely absorbed internally by its parts.

When positive photons, neutral neutrons, and negative electrons unite to form an atom, the fundamental and characteristic frequency of the atom is higher than the 3.29×10^{15} cycles per second or Rydberg constant.

Every composite form has a higher fundamental than its composite parts.

The larger organized combination of molecules or cells, and man himself, has a higher fundamental frequency.

The universe or World cell has the highest fundamental of all.

It is possible to calculate the fundamental characteristic or Rydberg factor of frequency of the World cell, of Man.

Vibration has three characteristics—frequency, position and amplitude.

The study of vibration always resolves itself to the study of numbers.

Integers assume a cosmic importance which has been acknowledged.

The unit represents the vibration of unit frequency of unit period and the multiples 2, 3, and 4 as well as basic divisions of 1/2, 1/3, 1/4 etc. become correspondingly important.

When stretched string vibrates, the unit frequency corresponds to the length of the string; the first harmonic, with a node at the midpoint has a frequency of 2; the second harmonic, with the string divided into thirds by two nodes, has a frequency 3 octaves above the fundamental etc.

The periods are the reciprocals of the frequencies.

The divisions into 1/2, 1/3 forms a basic contrast in the nature of things, these are the simplest divisions into halves or multiples of 2 are fundamentally the expression of octave intervals, or harmonic notes, they are regarded as identical in a musical way.

The division into thirds is the expression the fundamental harmony knows.

The division into halves and especially squares, fourths, forms an energizing and often disagreeable beat frequency.

The divisions into thirds basic harmonies of musical sounds, of primary and secondary colors, and of planetary configurations.

The higher primary numbers are less important, and their effects are not seen.

- Five is the next in importance, then 7.
- Six is a combination of 3 and 2.
- Eight is all twos.
- Nine is all threes.
- Twelve is of particular importance, being the product of the harmonious three and discordant four and so contains both elements.

The common tendency to count by twelve's, or its multiples; 1 dozen; 12" = 1'; 360 degrees in the circle, which is divisible by 12; 12 signs of the zodiac—they are expressions of importance.

The spectrum lines in both x-ray and the optical spectral range are the beat frequencies found by the combination of equivalent vibrations of positive and negative electrons and are the product of the component frequencies.

The solar day being the natural unit of time which implies that it is a natural frequency measurement.

The following formula is used on that basis, where F is the number of vibrations per mean solar day.

$$F = \frac{2590.790}{\text{wavelength in Angstrom Units}} \times 10^{20}$$

wavelength in Angstrom Units

The note n, giving the octave and decimal fraction of an octave of any vibration, is really found from:

$$n = \text{logarithm of } F$$

$$0.3010300$$

These relations make it possible to correlate, musical tones, colors and all things in God's creation. Even the heartbeat, the breath, life periods and the movements of the heavenly bodies.

Things of a psychic and cosmic radiation are correlated.

For example:

If the constant v represents the number of solar days in a year divided by 1000 or 0.3652422.

$F = 105^v$ by this it is found that the value of v for the fundamental Rydberg constant R is exactly 56 or 8×7 and for the critical frequency at which radiation begins to escape from the earth surface, between TV and short-wave radio is 35 or 5×7 .

The value of Y for the day is 0 by definition the U constant or 0.3662422 the number of sidereal days in a year divided by 1000 is used instead of v .

| | | |
|----------------------|----------------|---------------|
| The value of Y for | Sun = -7 | Jupiter = -10 |
| | Mars = -8 | Saturn = -11 |
| | Asteroids = -9 | Uranus = -12 |
| | Neptune = -13 | Pluto = -13.5 |

First Level CREATION TWO

In accordance with the usual stages of growth and manifestation, it is necessary that man understand the more realistic approach in that philosophy, or the teachings in the New Testament are not merely words of guidance, but also, within them are held some of the secrets of creation.

In creation of Man, there are three orderly stages:

1. Formation
2. Growth
3. Perfection

The scriptures are in harmony and truth. We say harmony because certain scriptures are related to one part of creation, and others are related to other things in creation. We say that the hand of God has guided man to tell the truth throughout all the ages.

Let us now refer to the scripture references on Formation.

FORMATION

Genesis 1:26—"And God said, Let us make man in our image, after our likeness: and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth."

"Let us make man in our image." This shows that man was made with all the ability of God and the nature of God. This also shows that man was set in the position of a god over the animal kingdom, or over all the earth. Therefore, man may look around him and see the earth for which he is responsible.

Material used

Now, let us see what man was made of.

Genesis 2:7—"And the Lord God formed man of the dust of the ground and breathed into his nostrils the breath of life; and man became a living being."

Note that the Lord God formed man of dust from the ground. The term "formed" shows that something else was used which confirms many scientific findings. Of these things, we will speak later on the vehicle in LEVEL II of lessons.

GROWTH

Now for the second stage of creation.

Colossians 2:19—"And not holding fast to the Head, for which the whole body nourished and knit together through its joints and ligaments grows with a growth that is from God."

In other words, your body is what your mind determines. The body grows by the power of God.

MAN is the physical aspect of the Creator. He is the being through whom the spoken word of creativity is manifest. He is God's vehicle of expression.

These lessons will teach you to move, live, and have your being in the Creative Word. This is the supporting evidence of the saying the LAW works whether you know it or not. For you are using it every day if you are living and breathing.

The secret of this lesson is found in Genesis 1:12—"and God saw that it was good." We must be able to see that there is nothing but good in manifestation around us, and especially in our world—our personal universe or atmosphere.

I wish to emphasize at this time that I do speak and not affirm the "Word". Speaking the word of power is as different as night is from day. Speaking the word of power makes you the Creator—not an empty boat in a storm-tossed sea.

The scripture declares in Colossians 1:15-16—"He) is the image of the invisible God, the firstborn of all creation: For in Him all things were created, in heaven and on earth, visible and invisible, whether thrones, or dominions, principalities, or authorities: all things were created through Him, and for Him." Though Paul was speaking of Jesus, he also revealed unto us the secret of it as being applicable to ourselves.

For Jesus said: "...of these things I do so shall ye do also; and greater than these." Therefore, Jesus associated himself with the man on the street which is you and I. For we are also partakers of that divine nature. As creators, we can recognize nothing else but that divine nature of the God creation. There is simply nothing else to recognize.

Paul declares: "For in Him, all the fullness of God was placed to dwell." Since it refers to Jesus, it naturally refers to the Son of God. As Jesus is our elder Brother, we are joint heirs with Christ. Therefore, we also are sons of God.

THIS IS A LAW—AN IMMUTABLE FACT

Indivisible and eternal in the heavens of all this solar system.

Using this knowledge and the power contained within it, we open a door which no man can shut. In case of necessity, we can shut a door which no man can open.

John declares in Chapter 1, Verse 1: "In the beginning was the WORD...and the WORD was God." Compare this with the writings of Moses in Genesis 1:1 where he tells us that in the beginning GOD CREATED.

Jesus showed us the power of the spoken WORD through the many healings, the producing of food which fed five thousand, and many others. All of these were done by speaking the WORD OF POWER.

I will cite only one example. In John 11, Jesus said: "Lazarus, Come forth!" You know that Lazarus did come forth and was healed—RIGHT NOW.

First Level CREATION THREE

CREATION AND ANGELS

Occult teachings give a dual explanation concerning the emanation and constitution of the Universe. They state that in Nature, there exists a directive Intelligence, plus a Sustaining Life and a Creative Will. Secondly, they inform us concerning the existence, nature, and function of certain individual embodiments of these three powers in Nature. In Egypt and Greece, they are called "gods"; in the East, "devas"; and in the West, "Angelic Hosts".

Occult Philosophy agrees with modern science that the universe consists not of matter, but of energy—that the universe of force is the Kingdom of the gods. For these Beings are fundamentally directors of universal forces, and power agents of the Logos—His engineers in the great and continuous creative process.

Creative energy is perpetually being poured out. On the way from its source to a material manifestation as physical substance and form, it passed through the bodies and auras of the gods. In this process, it is transformed, or "stepped down," from its primordial potency. Thus the creative gods are also "transformers" of power.

The super-physical worlds, which are the abodes of the gods, consist of matter of increasing tenuity of substance ranging from the density of the finest ether up to the rarest and most spiritual condition.

Highest among the objective "gods", or those aspects of God fully manifested, are the seven solar Archangels—the Seven Mighty Spirits—which include the well-known Michael, Gabriel, and Raphael.

The ministry of angels has been an accepted teaching of many faiths, and a living reality to a great number of people. Occult research supports this doctrine revealing that during such ministrations, certain Orders of Angels at once appear as the natural agents of those forces being used.

Their function is to converse and direct the forces generated by ceremonial action, prayer and adoration, and to serve as channels for the power and the blessing which descend in response. This ministration is far more effectively carried out when recognized by both ministrants and congregation.

Other aspects of the subject worth considering are what is the effect upon the evolving life in Nature of the church services, such as the Celebration of the Holy Eucharist, and the participation of the nature spirits and the Angelic Hosts in human worship?

While ceremonies intelligently performed are one of the most effective means of cooperation between angels and men, these are not required. For the human mind is, itself, a powerful broadcasting and receiving station. Given the power of a strong will with training in concentration and illumined by intuitive knowledge of the unity of life, the mind becomes an extremely potent instrument.

Whenever a human thought is strongly directed toward one particular Order of angels, the mental signal being dispatched is received by members of that Order. If the person sending the message has attained to a definite universality of consciousness, and his motive is in consequence entirely selfless, the angels will unfailingly respond. Man may then direct his thought power into his chosen field of work, assured of angelic cooperation, that he may enter therein.

Their active cooperation may involve such ministrations to others as spiritual healing, inspiration, protection, or helping to overcome a weakness of character. Collaboration may also be sought in order to gain inspiration required in the performance of certain altruistic work.

Angels can be powerful allies in such ministrations, having the ability to open up the channels of inspiration between the higher consciousness and the brain, and to convey telepathically a train of illuminating ideas to minds which are receptive.

Continued practice of invoking the help of the angels has been found to produce a change in the human aura—the link thus formed being visible as an area of brilliant light vibrating at the higher frequencies which characterize the auras of angels.

When this "devic seal"—as it is called—has been enlivened by ceremonial action, or by thought and will alone, it "transmits" a signal on the wavelengths of the particular Order of Angels whose aid is being invoked. This call is then "picked up" by the corresponding angels in terms of vibratory frequency. Their attention being gained, they are at once ready to help.

Clairvoyance is useful in this process, but not necessary. Regular practice, based upon intuitive recognition of the truth of these ideas, will quickly provide convincing evidence of the reality and effectiveness of cooperation between angels and men. This cooperation is constantly occurring in the realm of man's higher SELF, however unaware of this fact the lower self may be.

The Archangels, which in Christian terminology are called "Thrones," find it their special mission to inspire nations through their Higher Selves.

Under these conditions of angelic inspiration, the statesman becomes possessed of powers not previously suspected in him. As long as he selflessly serves his nation, this power will grow. But, should selfish interests interpose, the angelic and other inspiration would be withdrawn, and power soon decline.
